

FEATURING THE DIAMOND PRO STONE CUT™ RETAINING WALL SYSTEM

Craft a More
Beautiful World

Inspiration at First Sight

Crafting a more beautiful world often demands a rich palette of colors and textures. That is precisely what Anchor Wall Systems offers you with the creation of the Diamond Pro Stone Cut™ retaining wall system and the Highland Stone® retaining wall system.

Renowned for their rough-hewn faces and earthen tones, the Diamond Pro Stone Cut™ retaining wall system and the Highland Stone® retaining wall system impart landscapes with a beauty not commonly found in retaining walls. For greater visual appeal, these blocks have an affinity with nature, enriching projects with warmth and character. What's more, Diamond Pro Stone Cut and Highland Stone products are available in multiple sizes, making curves easier to create, thus allowing more specialized applications. Even better, they're only two of the many block options available within the Anchor Wall Systems family of wall products—all of which deliver the distinct appearance and structural integrity needed to meet any segmental-retaining wall challenge.

HIGHLAND STONE® 6-INCH RETAINING WALL SYSTEM

DIAMOND PRO STONE CUT™ RETAINING WALL SYSTEM

Meeting the New Expectation

Homebuyers' expectations aren't limited to the interior—homebuyers also insist on landscapes that please. According to Floyd Calhoun, a large residential developer, "The surrounding area has to be attractive. With the Diamond Pro Stone Cut™ retaining wall system, the style, aesthetics and quality are all there; it's an awesome product. The rounded corners and distressed face are perfect. And the color—I couldn't have custom-ordered a better color for the setting."

Crafted

DIAMOND PRO STONE CUT™ RETAINING WALL

Bridging the Gap

For a true test of segmental-retaining wall strength, few projects are more demanding than land bridges. At Armistead Point, a development in Williamsburg, VA, engineers designed a land bridge that is 240 feet long by 15 feet wide and provides a 250-psf traffic live load at its crest. They used the Diamond Pro Stone Cut™ retaining wall system as well as a load-transfer platform.

DIAMOND PRO STONE CUT RETAINING WALL SYSTEM

DIAMOND PRO STONE CUT RETAINING WALL SYSTEM

for Critical Applications

Proven performance with legendary strength. That's the legacy of Anchor Wall Systems' retaining walls.

Architects, engineers and contractors all turn to the Diamond Pro® retaining wall system for their critical wall needs. Especially now that they offer the same proven reliability with the beautiful look of quarried stone.

The performance characteristics of the Diamond Pro Stone Cut™ retaining wall system make them the proven solution for tall walls, transportation projects, commercial developments, water applications and other critical wall needs. Whether your site plans call for the creative use of a slope, retaining earth in a challenging environment or enhancing an area's appearance, there's no better choice than the Diamond Pro Stone Cut retaining wall system.
